DIGVIJAY KAILAS DHAWALE

Software, AI/ML and Network Engineer (Entry Level)
digvijaydhawale003@gmail.com | +91 7720043028 | Pune, India 411033

PROFESSIONAL SUMMARY

Electronics & Telecommunication Engineering graduate (SPPU, 2026) seeking entry-level roles in software development, AI/ML and networking. Built Python machine learning and AI projects, embedded firmware in C, and IoT systems, with hands-on networking practice in Cisco Packet Tracer. Industry experience in hardware functional testing and fault isolation at Jabil. Strong in troubleshooting and problem solving.

SKILLS

Programming: Python, C, Embedded C, HTML, CSS, JavaScript
AI / ML: Machine learning fundamentals, computer vision, Minimax game AI
Networking: Routing and switching, IP addressing and subnetting, TCP/IP, DHCP, DNS, network troubleshooting, Cisco Packet Tracer
Embedded and IoT: STM32, Arduino, ESP8266, NodeMCU, ESP32, AVR, UART, SPI, I2C, GPIO, PWM, ADC, sensors, PCB design, signal analysis
Tools: Git, Linux, STM32CubeIDE, Keil uVision, Arduino IDE, Proteus

PROJECTS

Plant Disease Detector | Python, Machine Learning, Computer Vision, HTML, CSS, JavaScript
- AI application that identifies plant diseases from leaf images and shows symptoms and possible solutions.

AI Tic-Tac-Toe | Python, Artificial Intelligence, Minimax
- Game-playing agent that uses the Minimax algorithm to make strategic moves against a human player.

Neuro Lift Drive | EMG sensors, AVR microcontroller, Embedded C, RF communication, L298N motor driver
- Vehicle-control system that processes muscle (EMG), motion and proximity sensor inputs with Embedded C firmware and sends actuator commands wirelessly.

Smart Grain Surfing Robot | NodeMCU, IoT, moisture sensor, L298N, servo motor
- IoT agricultural robot that monitors grain moisture in real time and controls navigation using DC motors and a servo motor.

Hydroponics Smart Farming | ESP32, sensors, relay module, water pump, Arduino IDE
- IoT system that monitors water and environmental conditions and automates selected hydroponic operations.

EXPERIENCE

Technician, NVIDIA Functional Testing | Jabil Circuit India Pvt. Ltd., Ranjangaon, Maharashtra | 10/2025 - 01/2026
- Performed functional testing of NVIDIA hardware using dedicated test fixtures.
- Isolated equipment and test failures through visual inspection, power supply checks, cable and connection inspection, and controller-to-equipment communication checks.
- Inspected and maintained fixtures; verified MCIO, IPEX and TB cable connections to keep test setups reliable.
- Performed preventive maintenance including fixture cleaning, equipment inspection and cable replacement.
- Followed SOPs, ESD protection procedures, safety guidelines and quality requirements in a manufacturing environment.

PCB Design Intern | Mithsagar Electronics
- Supported schematic interpretation, component placement, and PCB routing with attention to track width and grounding.
- Applied Design Rule Check (DRC), helped prepare designs for manufacturing, and tested completed boards.

EDUCATION

B.E. in Electronics and Telecommunication Engineering | 2022 - 2026
Samarth College of Engineering & Management, Savitribai Phule Pune University (SPPU), Pune
GPA: 7.92/10 (Overall) | 9.14/10 (Final Year)

CERTIFICATIONS

Networking Fundamentals & Network Access - Packt (via Coursera): network design, configuration and troubleshooting using Cisco Packet Tracer.
Embedded Systems & IoT Course - IPCS Global: Embedded C, Arduino and STM32, sensors, actuators, UART/SPI/I2C, ESP8266/NodeMCU IoT applications.

ADDITIONAL INFORMATION

Strengths: Problem solving, troubleshooting, communication. **Languages:** English (proficient), Hindi (advanced), Marathi (first language).
